Proved to be remarkably effective for both Type II diabetics and nondiabetic people with chronic weight problems, the Insulin Control Diet--based on low-carbohydrate and low-caloric intake--allows patients to decrease insulin production and convert stored fat into fuel. In this new edition, Dr. Calvin Ezrin provides updated ADA recommendations and a complete section of revised recipes and meal plans.

The American Diabetes Association/JDRF Type 1 Diabetes Sourcebook serves as both an evidence-based reference work and consensus report outlining the most critical components of care for individuals with type 1 diabetes throughout their lifespan. The volume serves not only as a comprehensive guide for clinicians, but also reviews the evidence supporting these components of care and provides a perspective on the critical areas of research that are needed to improve our understanding of type 1 diabetes diagnosis and treatment. The volume focuses specifically on the needs of patients with type 1 diabetes and provides clear and detailed guidance on the current standards for the optimal treatment of type 1 diabetes from early childhood to later life. To accomplish the book's editorial goals, Editors-in-Chief, Drs. Anne Peters and Lori Laffel, assembled an editorial steering committee of prominent research physicians, clinicians, and educators to develop the topical coverage. In addition, a Managing Editor was brought on to help the authors write and focus their chapters.
